

Aik Moh's Lab Chemicals Division

has continued to grow with the strong support of Fisher Scientific chemicals, Acros Organics and Maybridge drug discovery chemicals over the past years.

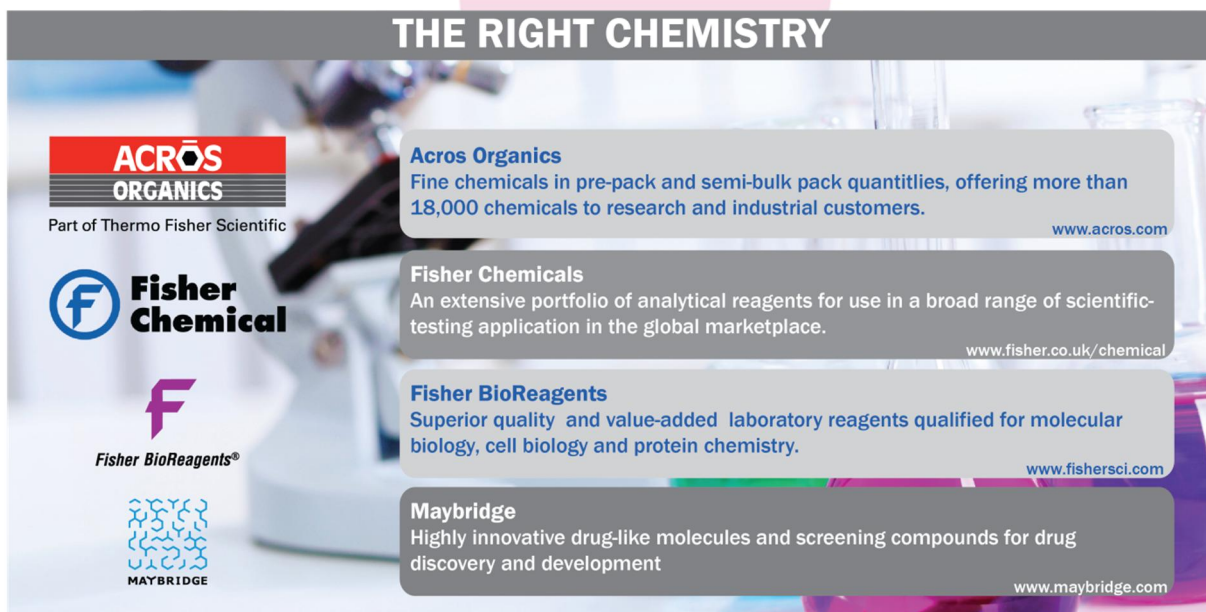

We are proud to be an established laboratory grade chemicals distributor in Singapore. We demonstrate our commitments to our valued customers by achieving both ISO 9001:2008 and ISO 14001:2004 accreditations. Today, we are the leading provider of laboratory chemicals and bioreagents in many industries, such as academics, pharmaceuticals, biotechnology and healthcare. We offer wide range of chemical grades e.g. AR, HPLC, Molecular Biology, Electronic, Tracemetal, LC/MS grades.

We also hold different import, export, storage and transport licences from different agencies to serve the laboratory chemical community with our delivery personnel trained in the handling of hazardous materials. Tapping on the strength and experience that our chemical logistics team has built up, we are able to offer excellent support products and dedicated services, unparalleled in the market.

In 2003, we are being appointed as the preferred distributor for ThermoFISHER Scientific in both Singapore & Batam. Our growth for the Laboratory Chemical Group has enabled Aik Moh to be a significant player in this market.

Till then, we carry four brands of Fisher Scientific chemicals and bioreagents that cover the demand of various applications and your chemical needs. At Aik Moh, we never stop looking for ways to make things better and to open up new business areas for you.

THE RIGHT CHEMISTRY

Part of Thermo Fisher Scientific

Acros Organics
Fine chemicals in pre-pack and semi-bulk pack quantities, offering more than 18,000 chemicals to research and industrial customers.
www.acros.com

Fisher Chemical

Fisher Chemicals
An extensive portfolio of analytical reagents for use in a broad range of scientific-testing application in the global marketplace.
www.fisher.co.uk/chemical

Fisher BioReagents®

Fisher BioReagents
Superior quality and value-added laboratory reagents qualified for molecular biology, cell biology and protein chemistry.
